

Find Peace, Health and Fulfillment Through Prayer

International speaker Marta Greenwood, was raised in Iran and was a medical nurse in London. She became critically ill with a life threatening disease. When the subsequent surgery was not successful, she was introduced to Christian Science and was completely healed through this prayer and Bible based system of healing.

Now a practitioner and teacher of Christian Science healing, Greenwood will discuss how God's universal law of love, as taught and proved by Christ Jesus, is a science and heals today. It's available for anyone to understand and prove.

You're invited to learn more at four public talks:
